

AARK DISPLAY LIMITED

WATER MANAGEMENT POLICY

Aark Display Limited recognises that water is a valuable natural resource and should be conserved.

It is our policy to make all practicable and reasonable efforts to use water efficiently and to reduce the demand within our operations.

TO ACHIEVE THIS, WE WILL:

- Monitor and measure the usage of water in the business to identify the most significant areas of use and to prioritise these areas for reduction measures.
- Monitor for leakage and repair any detected leaks immediately.
- Set water consumption targets.
- Communicate this policy to employees and involve them in achieving set targets.
- Install water saving devices for employee canteen, washing and toilet facilities.
- Investigate new developments in technology and equipment to increase the efficiency of water usage in our manufacturing process.
- Continue to use closed water systems within manufacturing to reuse as much water as possible.
- Collect, store and professionally dispose/treat any water contaminated during our manufacturing process.

Lee Goodman
Managing Director
